

Math

Description: Draw a BINGO grid with 4 vertical and 4 horizontal lines. In the center square write BINGO. Add in as many “free” spaces as you would like.

Solving equations:

1. On a sheet of paper, decide the equations and answers you are going to practice. Create more equations than you will actually need.
2. Create flash cards with math equations on the front and answers on the back.
3. On the BINGO grid, allow the students to write the solutions to the equations until their BINGO grid is full.
4. Shuffle the flash cards and play! As you flip over an equation, solve it and mark it on your BINGO sheet.

Florida Standards Practiced:

1. Understanding addition and subtraction
2. Solve problems involving the four operations
3. Write and interpret numerical expressions

Reading

Description: Draw a BINGO grid with 4 vertical and 4 horizontal lines. In the center square write BINGO. Add in as many “free” spaces as you would like.

Vocabulary:

Create flash cards with both vocabulary words and definitions written on them. Fill in the BINGO grid with the vocabulary words. To play, call out the definitions and have students identify the word on the grid.

Site/ Spelling Words:

Create flash cards with site words. Fill in the BINGO grid with the same words. Call out the site words to have students identify them on their BINGO grid. **Variation:** Have students call out a word that rhymes or is the opposite of the word on their BINGO grid.

Florida Standards Practiced:

1. Phonics and word recognition
2. Vocabulary acquisition and use
