

Decode the Phrase

Description: Cyphers can be a great way to practice math equations and letter recognition! As a family decide a topic for the phrase and the math operation you will use. This activity can be divided into sections so that each family member has a part to complete!

Steps:

1. Decide on a phrase (adults)
2. Write out the phrase using dashes (_) and appropriate spacing.
3. On a separate sheet of paper, write out the alphabet A-Z. Give space next to each letter to write the corresponding number.
4. On post-it notes, write the math equations that need to be solved to decode the phrase.
5. Assign each sum a letter by writing them next to each other.
6. Let your family work together to solve the cypher and decode the phrase!

Florida Standards Practiced:

Math

1. Solve problems involving the four operations
2. Know number names and count sequence

English/Language Arts

1. Fluency
2. Comprehension and Collaboration
3. Phonics and word recognition
